

BALDWIN

EVOLVED

Sales Bulletin
Nov 2017

Baldwin combines the latest in electronic security with timeless designs and superior function. Access can be remotely controlled using the Kêvo app on any smart phone. The lock can also be activated by touch, through an optional FOB or by turning a traditional key. It also works with the most popular smart home systems, including Nest, Ring and Amazon alexa.

Baldwin offers 18 lock designs in 18 finishes. The electronic components are designed into the lock's exterior.

- Grant access with Ekeys and monitor who is locking and unlocking. Ekeys can be reassigned from person to person as an anytime or a scheduled Ekey.
- Give your guest unrestricted access to your home for 24 hours. Guest Ekeys can be resent to anyone as needed. After a 24 hour period, they will be automatically deleted.

Bluetooth technology and key fob touch access offers convenience, plus traditional key access
