Concepta Slide-In Hardware Kits

The HAWA-Concepta slides doors alongside cabinet bodies or into wall recesses. Room-high designs and walk-in cabinets are easy and efficient to implement. The well-thought-out concept has omitted a bottom guide channel and offers optimum flexible room utilization with no protruding door obstructions. A true master of design thanks to a broad bandwidth of available dimensions, weights and material thicknesses.

Advantageous wherever variable room utilization and unobstructed access should leave a tidy impression, for instance the home office, bedroom, or hiding appliances in the kitchen or washroom/bathroom.

Concepta 40 Kit
18924733

All sizes

Door width range: 11-13/16" to 2' 11-7/16"
