

SALICE Exedra Pocket Door System
**** In Stock in SF ****

Salice’s pocket door system features an assisted soft-close door-return mechanism and a door opening safety device. **This new soft close magnetic damper is directly attached to the main track which provides a smoother soft close.** The system incorporates an exclusive, synchronised cam movement – the hallmark of all sliding mechanisms supplied by Salice.

In addition, this system has been designed to offer simple fitting and adjustment, and can be installed, adjusted and inspected on site, as all three movements are adjusted from the front of the cabinet in a simple, intuitive way. If so required, the complete mechanism can be removed from the front without dismantling the cabinet side. For use with individual door weights up to 88 lbs.

Door Features

- Maximum weight for each door: 88 lbs (30 Kg). (w 5 hinges allowed, distributed evenly)
- Thickness: - min. 3/4" (19 mm) - max. 1-3/16" (30 mm)
